STEP-BY-STEP GUIDE ON HOW TO CHECK-IN PMP EXAM ONLINE

Now that you are going to take the online PMP exam on the scheduled day. Taking exams can be stressful. But no worries, check out step-by-step guides provided by SPOTO; you definitely can get well prepared for your PMP exam on OnVUE in the comfort of your home or office while being monitored by an offsite proctor.

Before we detail how to check in the PMP exam, please ensure that you have finished the preparation for performing a system test, finding your testing space, and getting your ID ready as below:

1. BEFORE EXAM DAY

✓ Perform a system test

Before the exam day, you need to finish the required system test and exam simulation

✓ Find your testing space

Find a quiet, distraction-free area and use good lighting in your home or workplace to take your exam.

✓ Get your ID ready

Your ID should be valid and up to date.

- ☒ Perform a system test

Make sure to do the required system test and exam simulation before exam day.*

*Issues? Check out the [technical requirements](#).

- ☒ Find your testing space

Find a quiet, distraction-free area in your home or office to take your exam.

Testing advice

- ☒ Get your ID ready

Your ID must be valid and up to date. Does your program have specific ID policies?

test, too!

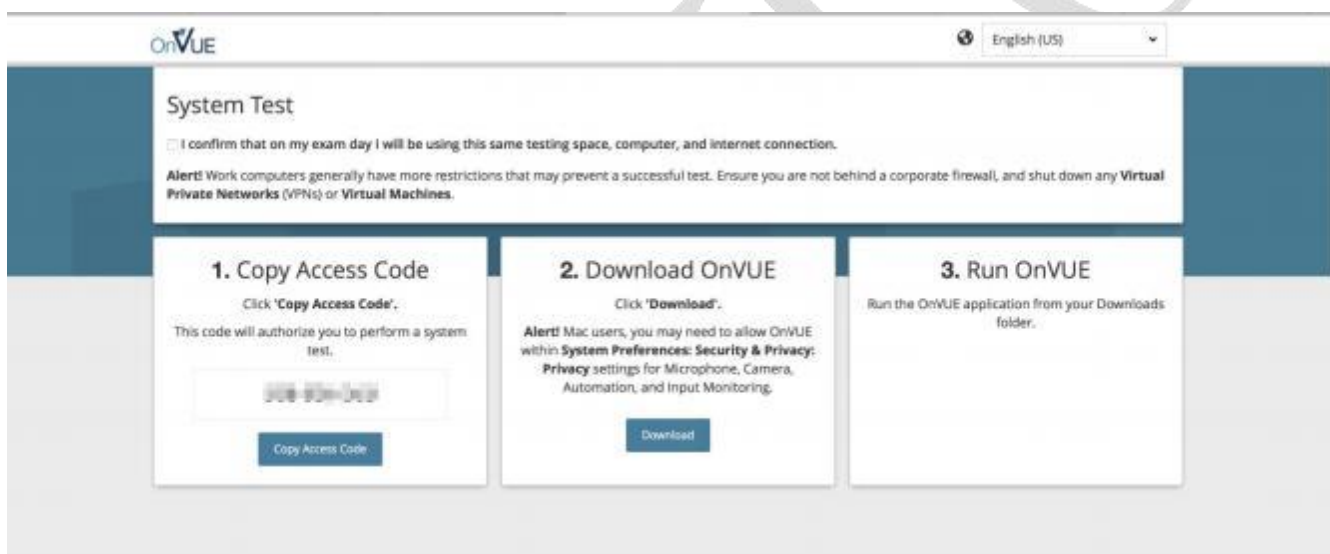

Now, it's your turn to check in for your PMP exam. Two part will be included: How to start the check-in and the process of check-in.

How to Start the Check-in?

To start your OnVUE exam, sign in first, either on your exam program's website or on the Pearson VUE webpage for your exam program.

On the next step, you should find your OnVUE exam and click the button of "Begin Exam" in order to start the process of check-in

Noted that Check-in is only available **30 minutes before to 15 minutes after** your scheduled appointment time—the Begin Exam button is displayed only during that time.

- Click the button of "Copy Access Code" when you see it; the access code is your unique code for your OnVUE testing session.
- After you download the OnVUE application, you must run it manually; Please noted that OnVUE is not run automatically owing to the security reasons
- After OnVUE starts, close any other applications that running on your computer.

STEP 1. Equipment checks

STEP 2. Phone Identification

If you don't have a mobile phone, you can use your webcam to take the required photos.

Here is the Tips for taking headshots that provided by the Onvue Official

- Take your **headshot** in front of a solid background using good lighting.
- Prompts will indicate any adjustments needed to get a good photo — just follow the instructions.

ID photos: Onvue uses your ID to verify your identity. However, the requirement of the photos depends on the type of ID that you used:

- Driver's license, government-issued ID, or other approved ID card: capture front and back.
- Passport: capture photo page only.

Testing environment photos: you need to take **four photos** to show your testing environment during the check-in.

Technical requirement	Technical Specification
Operating System	Windows 10 (64-bit) (excluding 'S Mode') Mac OS 10.13 and above (excluding beta versions)

Technical requirement	Technical Specification
	Note: Windows Operating Systems must pass Genuine Windows Validation. • Windows Vista, Windows XP and Windows 7 are strictly prohibited for exam delivery • All Linux/Unix based Operating Systems are strictly prohibited.
Firewall	Do not take your exam in a setting with a corporate firewall (including VPN) or alert your Network Administrator to the network configuration requirements . We recommend testing on a personal computer. Work computers generally have more restrictions that may prevent successful delivery.
